Sure, are you free now or later today at 1:30pm or 2pm? If not, what times/dates would work best for you?

-Ricky

Subject: RE: Coney Island Creek Site Inspection (SI) Report

Good morning Mr. Kupferman,

As you may be aware, EPA posted the site inspection (SI) report for the Coney Island Creek on [EPA's webpage](#) on January 13, 2022. The SI report, as posted, included three references numbered 20, 21, and 23 that contained redactions. Please note that EPA reposted [the SI report](#) to the EPA webpage on January 20, 2022 without these redactions.

Subject: RE: Coney Island Creek Site Inspection (SI) Report

Hello Mr. Kupferman,

The Site Inspection (SI) Report for the Coney Island Creek site (Site) includes three references, numbered 20, 21, and 23, entitled the Abbreviated Preliminary Assessment Checklist (APA), Pre-CERCLA Screening/Site Discovery Final Summary of Findings Report, and Pre-CERCLA Screening Checklist/Decision Form (PCS), respectively. These references in the SI Report were posted to the Site page on EPA's website with redactions. It is EPA policy to redact certain portions of such documents at this stage in EPA's evaluation of the Site.

However, the APA and PSC for Coney Island Creek were previously publicly released in un-redacted form. Therefore, EPA is reposting the SI Report with these references in un-redacted form. Portions of the SI Report that contain other redactions that were not previously publicly released will not be changed.

Please let me know directly if you have any other questions. I can be reached by email at ng.ricky@epa.gov and by telephone at 212-637-3151.

Thank you,

Ricky C. Ng

Subject: Coney Island Creek Site Inspection (SI) Report

Hello Mr. Kupferman,

Today, EPA released the site inspection (SI) report for Coney Island Creek. This report builds on the information gathered by EPA during the preliminary assessment (PA) completed in September 2020 and summarizes data from 50 sediment samples and eight surface water samples.

EPA shared the SI report with the New York State Department of Environmental Conservation, our state partner agency. Once they have had an opportunity to review the information, we will begin discussions about what next steps might be appropriate for the site.

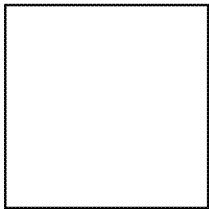

Please note that EPA must first complete our investigative and consultation work before making any determinations on whether we will propose the site for inclusion on our Superfund National Priorities List.

EPA plans to host a virtual community meeting for Community Board 13 sometime in February to discuss the SI report and answer any community questions. If you're not on the Community Board 13 email list and you're interested in participating in the meeting, please let me know, and I will have the calendar invite shared with you when it is available.
